ATTIRE

ALL SESSIONS AND EVENTS ARE "MOUNTAIN CASUAL"

Innovasis is a rapidly growing company engaged in the research, development, manufacturing and marketing of spinal implant devices and related products. Innovasis offers spinal implants and instruments that address the major pathologies and focus areas of traditional spinal surgery including deformities, degenerative conditions, trauma and tumors—all of which may result in severe back pain or paralysis. Spinal implants are aimed at restoring mechanical and neurological function by readjusting vertebral positioning until bone fusion occurs. Innovasis is fully committed to providing surgeons and distributors with training, support and excellent customer service, thus ensuring the establishment of a strong and long term strategic partnership.
